

Leitz Tool Recycling

Reconditioning of solid carbide

Collect, contact and donate!

Tools and tool systems consist of valuable and sometimes rare raw materials. The extraction of these components is time-consuming and requires large quantities of resources. Recycling, on the other hand, helps to conserve natural raw materials and protect our environment.

Our Leitz Tool Recycling (LTR) helps to return tools and tool parts into a sustainable remanufacturing process. Join us and contribute to the active protection of our environment, while supporting our local communities.

We have partnered with charity Backpacks 4 VIC Kids, a local organisation providing essential material aid to displaced children. All proceeds received from our Carbide tool recycling program are donated directly helping children entering emergency care.

YOUR BENEFITS

- Free collection of used carbide tools
- Active sustainability practice for your business
- Involvement in supporting our local communities through charity

AT A GLANCE

- Collection of drills, cutters and turnblades made of carbide by Leitz service drivers or collected at our warehouses.
- No minimum amount required, our drivers will pick up any old tools on their next scheduled delivery run to your business, or simply leave them with at our warehouse locations.
- Receive regular updates of donation amounts and impact for our partnered charity, Backpacks 4 VIC Kids.

Your benefits due to ...

SUSTAINABILITY

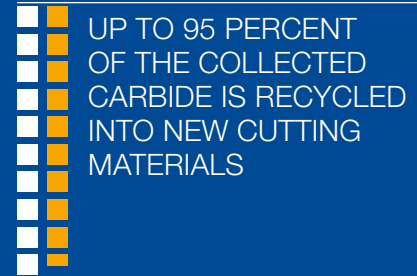

Collect recyclable materials, conserve resources, protect the environment

- Conservation of valuable resources through recycling
- Up to 70 % less energy consumption through raw material recycling
- Up to 40 % less CO₂ emissions through recovery
