

## Leitz PlugTec

**The highly stable frame corner joint  
for windows and doors**

**Your benefits  
at a glance**

- Extraordinary stability  
up to 180 kg (IV78)
- Efficiently and inexpensively  
to produce
- Flexible in application

# Leitz PlugTec – The highly stable frame corner joint for windows and doors

## Extremely stable, high quality

- Guaranteed load capacity for sash weights up to 180 kg for wood thickness greater 78 mm (testing institute IFT Rosenheim)
- Exact and formfitting frame corner joint due to the application of slots and tenons
- Significantly more stable than conventional corner joints as for example counter/dowel- or slot/tenon joints
- Can be used even for very small moulding width

## Efficient production

- Cost-effective production in one workpiece clamping on the machine
- Material saving due to no additional connection elements
- Time saving through the reduction of processing time

## Flexible application

- Can be used for nearly all window- and door systems
- Can be realized on all conventional window CNC machines
