

HeliCut-System

Easy – Low noise – Efficient

leitz

HeliCut-System

The all-rounder for flexible processing of wood and plastics

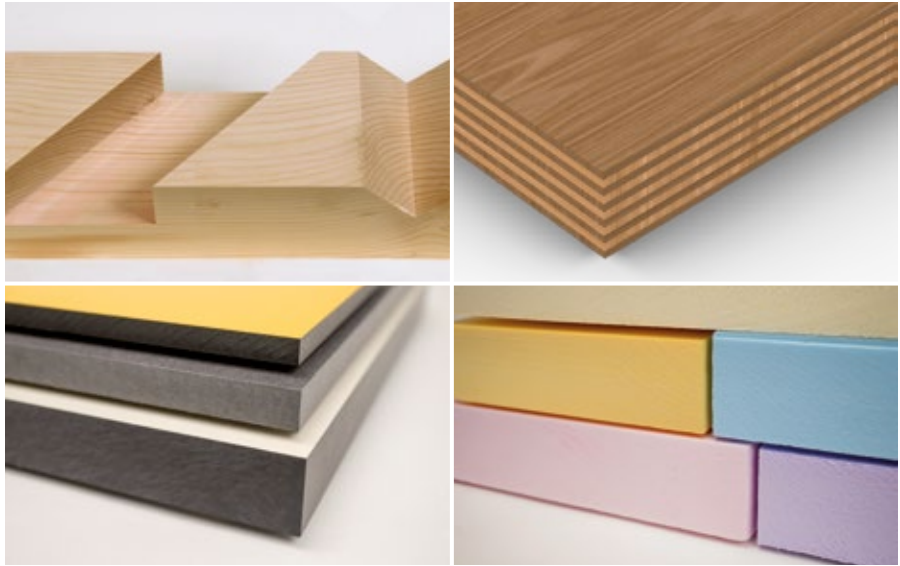

Benefits at a glance

- Maximal flexibility
- User-friendly handling
- Excellent performance
- Maximum efficiency

HeliCut-System – The suitable tool solution for various working materials

HeliCut ensures suitable processing quality in various working materials.

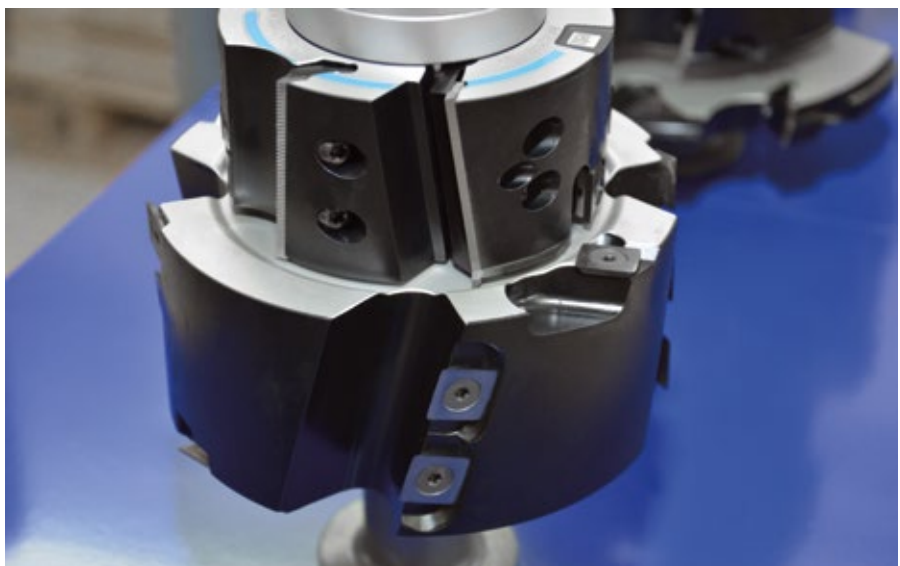

- Solid wood
- Wood-derived materials
- Plastics
- Foams
- And many others

HeliCut-System – For each machine the suitable tool

Whether for manual or mechanical feed or as shank- or bore tool – HeliCut provides different machine concepts.

- Spindle moulders
- Continuous machines
- CNC-machining centres
- Specific machines
(e.g. joinery machines)

HeliCut-System – Flexibility, Handling, Performance and Efficiency all in one

Maximal flexibility

- Suitable to process nearly all working materials
- Applicable on different machine types
- Wide range of application through three edge qualities

User-friendly handling

- Knife change without mounting equipment
- Standardized turnblade knives

Excellent performance

- Optimized for high speed cutting
- Large cutting volumes through optimized edge- and gullet geometry
- Outstanding performance times and significant reduction of set-up times through perfect selection of cutting materials

Maximum efficiency

- Machine protection through high balancing quality and aluminium light weight construction
- Tungsten carbide knives, 4 times changeable
- Excellent price-performance ratio
- 5 times longer performance time in comparison to market usual cutterhead systems

HeliCut-System – Provides versatility

- Applicable as standard- or task-specific tool
- Applicable as complete assembly or tool set component
- Applicable as shank- or bore tool

Leitz – Your qualified partner

Leitz provides partnership and technology-leading know-how with three components for your success:

- Innovative tooling systems, resource-protective and quality-increasing for better production
- Tool Management, customized, modular or comprehensive for more efficiency
- Outstanding service, absolutely reliable, always close to the customer, all over the world
