

Solutions for
Advanced Materials
efficient and versatile

Leitz full range of products

The efficient processing of Advanced Materials

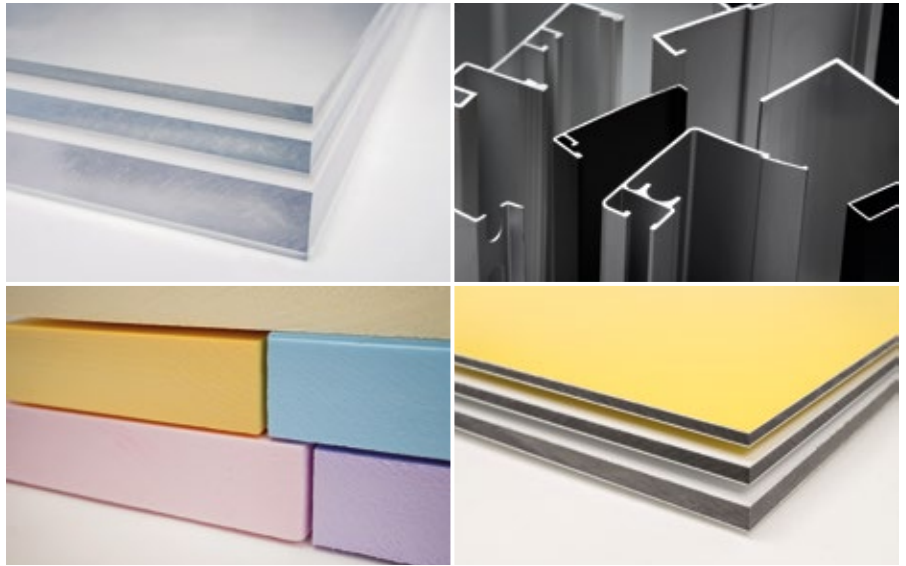

Benefits at a glance

- Comprehensive standard program of tools to efficiently process plastics, insulating materials, aluminium and composites
- Customized tool solutions to process special working materials

Leitz full range of products to process Advanced Materials using different working materials.

In the sector of Advanced Materials, Leitz focus on the processing of plastics, insulating materials, aluminium and composites.

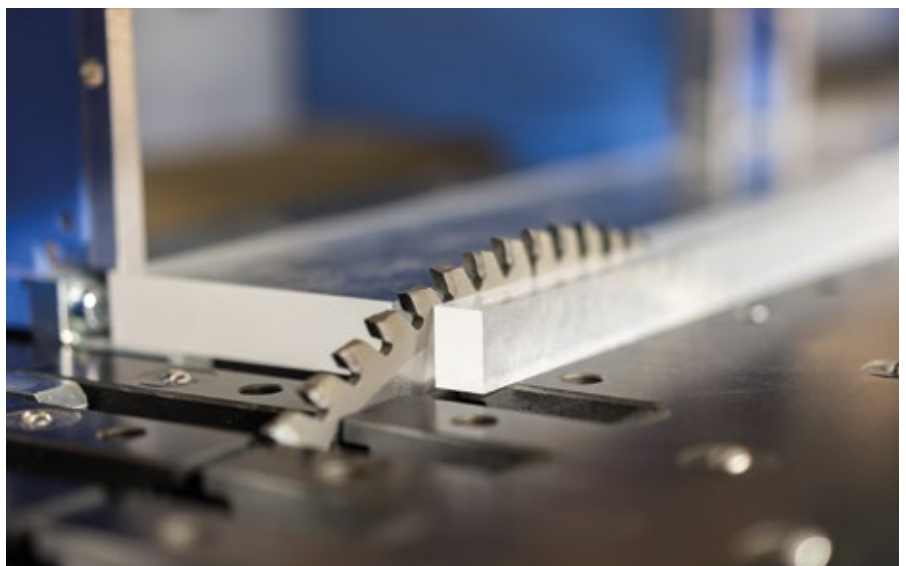

- Plastics
(e.g. PMMA, PC, PVC, PE, HPL)
- Insulating materials
(e.g. PU-foams, mineral wool, glass wool)
- Aluminium
(e.g. hollow profiles, solid materials)
- Composites
(e.g. Alucobond®, compact gluelam)

Leitz solution to process Advanced Materials. For every need the suitable tool.

Doesn't matter what kind of working material shall be processed, Leitz supplies the suitable tool solution.

- BrillianceCut circular saw blades for finish cut quality in PMMA and PC
- HeliCut copy-shaping cutterhead to pre-process plastics as for example PP or PE
- Gullet-protected circular saw blades to process insulating materials, as for example mineral wool or glass wool
- Moreover, Leitz offers customized tool solutions to process specific working materials
