Diamaster EdgeExpert

The specialist in high-quality edge performance on demanding decors

Benefits at a glance

- Outstanding cut quality of edges and core material through optimized cutting edge geometry
- Significantly increased tool performance
- Worldwide Leitz on-site resharpening service for cost and time savings

Diamaster EdgeExpert - The specialist in high-quality edge performance

Diamaster WhisperCut EdgeExpert is the quiet and lightweight specialist for edgebanders. With light metal body and resharpenable/replaceable PCD knives.

Routers Diamaster EdgeExpert offer outstanding cut quality at maximum feed rates and perform up to 15 times longer than conventional PCD routers.

Joining cutters Diamaster PLUS EdgeExpert PCD-tipped joining cutters allow for perfect finish quality and outstanding tool life.

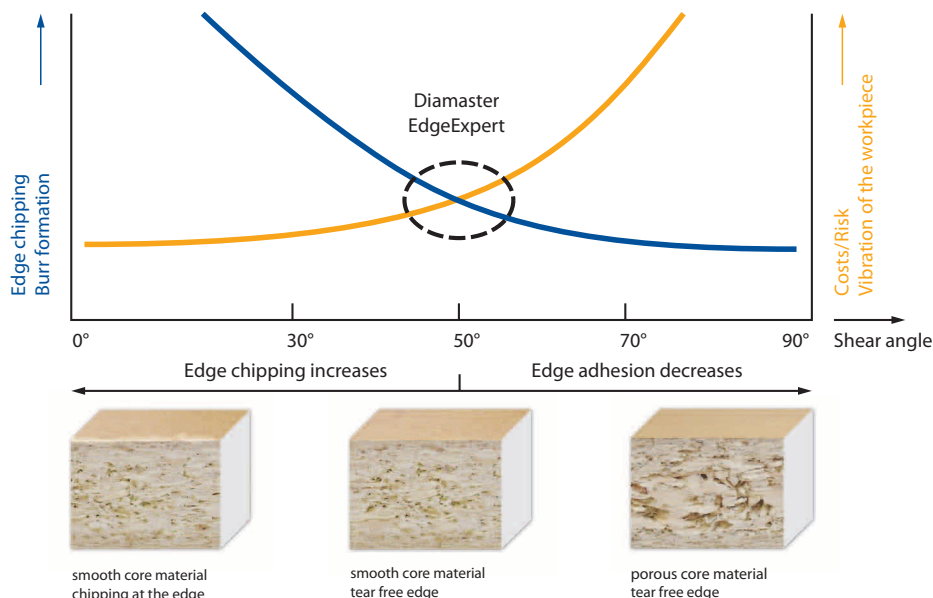

True experts in zero joint edging technology

The percentage of difficult-to-machine decors in furniture production constantly increases, demanding new tooling concepts such as the Leitz Diamaster EdgeExpert program.

Whether wafer-thin paper laminates, veneers or sheets of high-gloss coating, the Diamaster EdgeExpert impresses with tear free edges and core material on throughfeed machines and CNC machining centers. Especially suitable for zero joint edging technology by laser, plasma or hot air.

The shear angle makes the differences
