

Planing/profiling cutterhead with back-serrated blank knives

The multi-purpose tool, also for wide profiles

During the profiling process, profile changes can result in longer tool procurement times. In addition, changing materials and different customer requirements demand a certain flexibility in the design of the profiles.

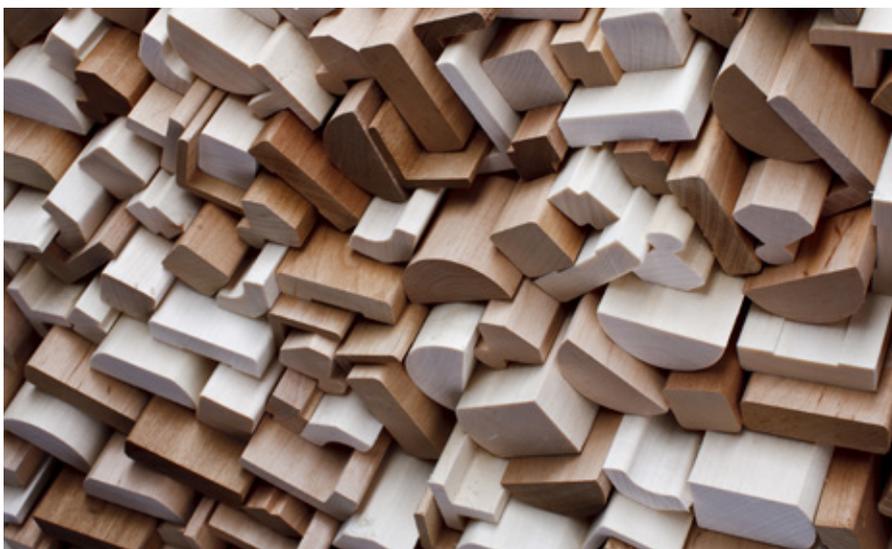

With the profile cutterhead for back-serrated blanks, Leitz offers a tool for machining any profile using standard tool bodies and individually profiled blanks. By mounting straight knives, the tool can also be used for planing.

YOUR BENEFITS

- Short-term availability of individual profiling tools
- Profiling and sharpening of the blank knives is possible on site
- Excellent finish quality

AT A GLANCE

- For standard 8 mm blanks (HS or MC) as well as for HW blanks with support plate (PKS)
- With bore, hydro clamping or HSK 85 WS adaptor
- Blank knives can be resharpened many times
- Suitable for all conventional planing and profiling machines
- For processing soft and hard woods, MDF, thermoplastic plastics and chipboard
- Cutterheads are available from stock, blanks can be profiled on site

100 %

FLEXIBILITY DUE TO CUSTOMER-SPECIFIC PROFILES

Up to 6-fold

LIFETIME DUE TO MC-HIGH PERFORMANCE COATING IN COMPARISON TO UNCOATED HS PLANING KNIVES

Your benefits due to ...

FLEXIBILITY

Adaptable and individual

- Short-term profile change possible due to the possibility of profiling the standard blanks on site
- Vast array of design possibilities due to a multitude of different standard blank dimensions
- The right cutting substrate for different workpiece materials

QUALITY

Perfect finish quality

- Excellent finish quality; knives ground in the cutterhead achieving perfect running accuracy
- Balanced due to the knife weight tolerance

PRODUCTIVITY

Better tool life and reduced machine downtime

- Optimal tool life by using the ideal workpiece cutting materials
- Less tool changing through long lifetime

Planing/profiling cutterhead with back-serrated blank knives: the highly flexible tool available at short notice for any application!
