

TurboPlan PLUS

Optimized tool for planing

Productivity and efficiency are partially governed by tool feed rates as well as long set-up times.

The TurboPlan PLUS hydro planerhead from Leitz fully harnesses the potential of high-performance machines. The higher number of teeth enables the maximum feed rate to be used while keeping the best planing quality – and thus a significant increase in productivity. Knives with Marathon high-performance coating extends the tool life many times over. Replacing the knives is also quick and safe: The simultaneous hydro knife clamping system saves valuable time during set-up.

YOUR BENEFITS

- Higher number of teeth for maximum feed speeds
- Fast, safe and easy knife change

AT A GLANCE

- Knives with Marathon high-performance coating
- Weight-optimized tool body
- Hydraulic clamping system
- 10 mm resharpening area
- Applicable in soft and hardwood
- Particularly suitable for high-performance planing machines

3- TO 5-fold

- LONGER TOOL LIFE THROUGH MARATHON HIGH-PERFORMANCE COATING

-80%

SET-UP TIME DUE TO HYDRO KNIFE CLAMPING SYSTEM

-30%

WEIGHT COMPARED WITH STEEL TOOL BODY

Your benefits due to ...

PRODUCTIVITY

High-performance cutting thanks to improved tool technology

- Feed speed up to 300 m/min through higher number of teeth
- Productivity increase by using the maximum feed rate
- Higher tool life time through knives with Marathon high-performance coating

EFFICIENCY

Shorter set-up times

- Fast and easy knife change due to hydro knife clamping

SUSTAINABILITY

Protection of resources and machine

- Multiple tool lives through 10 mm reshaping area
- Machine spindle protection as well as easier handling through a weight-optimized tool body

TurboPlan PLUS:
Machine tuning for
your planing unit!
