

# flexTrim3 profile cutter

Super-fast profile change on  
Homag Edge banding machines

Manufacturers in furniture production today work with a mix of very different edge materials and thicknesses. With batch sizes becoming smaller and smaller, this material mix can only be mastered economically with super-fast profile changes in edge finishing.

The Leitz profile cutter “flexTrim3” allows automatic changes between three profiles within a few seconds without a tool change. This means that different edge thicknesses can be handled extremely economically, even with small batch sizes.

## YOUR BENEFITS

- Three profiles without tool change
- Length profiling and corner copyshaping with one tool
- Reduce set-up times

## AT A GLANCE

- Reusable mechanical components
- Customer-specific radii up to 3 mm possible
- Bevels individually possible up to 45°
- Compatible with Homag cutting unit FF32
- For all softwood, hardwood, veneer and plastic edging
- Available at short notice
- Diamond cutting edges

# 3 IN 1

- VARIOUS PROFILES
- ONE TOOL

# -100%

- MACHINE SET-UP NOT REQUIRED

# 100%

- FLEXIBILITY DUE TO IN CUSTOMER-SPECIFIC PROFILES

## Your benefits due to ...

### FLEXIBILITY

**Individual application of various radii, bevels or profiles**

- High flexibility through customer-specific radii up to 3 mm and bevels up to 45°
- Possible combination of “with feed” and “against feed” tool

### EFFICIENCY

**Less machine downtime and lower production costs**

- Reduced set-up times
- Optimized production processes through automatic profile change within seconds

### PRODUCTIVITY

**Increased product versatility within one process cycle**

- Higher productivity with different edge materials/thicknesses and small batch sizes

flexTrim3  
profile cutter:  
Super-fast  
profile change in  
the edge finishing!
